NASSIR GHRAIZI

Senior Software Developer | Cybersecurity Researcher

+961 81 670 536 | nassirghraizi8@gmail.com | Aley, Lebanon | linkedin.com/in/nassirgh

SUMMARY

Senior software developer with 6+ years of experience designing and building scalable, secure web applications and RESTful APIs with PHP and Laravel. Skilled in database schema design and query optimization (MySQL, PostgreSQL), microservices, and SOLID architecture, with hands-on AWS DevOps experience: containerizing applications with Docker, deploying on EC2 and ECS, building CI/CD pipelines with AWS CodePipeline and GitHub Actions, managing releases, and provisioning infrastructure as code with Terraform. Brings a strong application-security background from freelance bug bounty research on YesWeHack and Bugcrowd, including a critical IDOR finding, and applies secure coding practices against SQL injection, XSS, and CSRF in day-to-day development. Experienced in leading Scrum ceremonies and comfortable working independently or within cross-functional teams.

SKILLS

- **Backend:** PHP, Laravel, RESTful APIs, JWT authentication
- **Cloud & DevOps:** AWS (EC2, ECS, CodePipeline), CI/CD pipelines, GitHub Actions, Docker, Terraform (Infrastructure as Code), release management
- **Databases:** MySQL (DDL/DML), PostgreSQL, Eloquent ORM, query optimization, schema design
- **Architecture:** Server-side architecture, microservices, SOLID principles, dependency injection, middleware
- **Security:** OWASP vulnerabilities (SQL injection, XSS, CSRF, IDOR), web and API penetration testing, vulnerability assessment, bug bounty research
- **Testing & Tools:** Pest (unit tests), Git, Linux, Kali Linux, VirtualBox, VMware
- **Frontend & Methodologies:** Vue.js, HTML, CSS, JavaScript; Agile, Scrum
- **Languages:** Arabic (native), English (professional)

PROFESSIONAL EXPERIENCE

Senior Software Developer
Dec 2024 – Aug 2026

Aspire Software

- Designing and developing scalable, maintainable, and high-performance applications.
- Optimizing database queries and designing efficient database schemas.
- Making architectural decisions and suggesting improvements.
- Identifying performance bottlenecks and optimizing application speed.
- Implementing security best practices to prevent SQL injection, XSS, CSRF, and other vulnerabilities.
- Building CI/CD pipelines with AWS CodePipeline and GitHub Actions to deploy Dockerized applications to AWS EC2 and ECS, with infrastructure provisioned using Terraform.

Backend Developer
Jun 2023 – Apr 2024

Abiroot Digital

- **SOLID & Dependency Injection:** Applied SOLID principles and used Laravel's dependency injection for modular, scalable, and testable backend solutions.
- **Security:** Implemented data encryption, authentication, and access control using Laravel's built-in systems and middleware.
- **Microservices:** Built isolated, loosely-coupled components to enhance system modularity and deployment flexibility.
- **Eloquent Relationships:** Implemented complex relationships and used eager loading to optimize queries and reduce database load.
- **Middleware & Security:** Developed custom middleware for request filtering, role management, and session security.
- **Agile & Scrum:** Led Scrum ceremonies to boost team productivity and ensure timely project delivery.

Backend Developer
Mar 2022 – May 2023

Globalistic Tech.

- **Backend Architecture:** Designed and implemented scalable backend architecture using the Laravel framework, ensuring high reliability and optimal performance for applications.
- **Database Management & Eloquent ORM:** Managed databases using Laravel's Eloquent ORM, implementing complex relationships (One-to-One, One-to-Many, Many-to-Many) and optimizing queries for performance.
- Configured and scheduled tasks using Laravel's task scheduler, automating routine processes within the application.

Backend Developer Jul 2020 – Feb 2022

Kerning Code

- **Backend Architecture:** Designed and implemented scalable backend solutions using the Laravel framework, focusing on high reliability and performance optimization.
- **RESTful APIs:** Developed and maintained RESTful APIs with JWT-based authentication for secure and efficient client-server communication.
- **Security Practices:** Implemented data encryption, SQL injection prevention, and mitigation of common vulnerabilities to secure user data.

Full Stack Web Developer Jun 2019 – May 2020

Integrated Digital Solutions

- **Backend Architecture:** Designed and implemented a scalable backend architecture using the .NET Framework, ensuring reliability and optimal performance while adhering to the MVC pattern.
- **RESTful APIs:** Developed and maintained RESTful APIs, implementing robust security measures for authentication and authorization.
- **Agile Methodologies:** Embraced Agile methodologies by actively participating in sprint planning, daily stand-ups, and sprint reviews.
- **Error Handling and Logging:** Integrated robust error handling and logging mechanisms to track application behavior and diagnose issues.
- **SOLID Principles:** Applied SOLID principles to enhance code maintainability and scalability.

CYBERSECURITY RESEARCH (FREELANCE)

Cybersecurity Researcher | Freelance Nov 2023 – Present

YesWeHack

- Ranked #1 researcher on a bug bounty program on YesWeHack.
- Identified and reported security vulnerabilities through bug bounty programs on yeswehack platform, with more than 20 valid findings.
- Discovered a critical IDOR vulnerability that allowed unauthorized access to sensitive client data including phone numbers, email addresses leading to immediate remediation after reporting the issue.
- Reported multiple medium-severity vulnerabilities, including XSS, and authentication bypasses, contributing to improved security measures.
- Conducted in-depth penetration testing and vulnerability assessments, focusing on web applications, APIs, and authentication mechanisms.

Cybersecurity Researcher | Freelance Oct 2023 – Present

BugCrowd

- Discovered and reported a security vulnerability in Atlassian's bug bounty program.
- Provided detailed Proof-of-Concept (PoC) exploits, collaborating with security teams to triage, validate, and remediate vulnerabilities effectively.
- Uncovered a DDoS vulnerability, demonstrating how an attacker could exploit the system's resources, leading to potential service disruption and downtime, prompting the implementation of rate limiting and mitigation strategies.

ACHIEVEMENTS & PROJECTS

Recognition Award – Bug Bounty Hunter · *Semicolon* 2025

- Recognized by Semicolon for discovering security vulnerabilities.

TWO MINDS Academy · *academy.twomindsengine.com* 2026

- Created a learning platform that helps students and aspiring tech professionals learn software development.

EDUCATION

Bachelor's Degree in Computer Science · *Lebanese University* 2016 – 2019

- Coursework in software development, data structures and algorithms, and networking (TCP/IP, HTTP, DNS).

CERTIFICATIONS

Certified Cybersecurity Specialist · *Semicolon Academy* 2024

- Training in wireless, system, network, and mobile app security.

Full Stack Web Developer · *Codi-Tech* 2019 – 2020

- 8-month intensive program in frontend and backend development (HTML, CSS, JavaScript, PHP, Laravel, Git).
